DETAILED ACTION

Election/Restrictions

Election of species should be required prior to a search on the merits in all applications containing both species claims and generic or Markush claims.(MPEP 808.01(a))

Claims 1 and 8 are generic to a plurality of patentably distinct species of polyorganosiloxanes which encompass a plethora of different compound species that require a burdensome classification, and/or bibliographic, manual and computer search. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (i.e., a single compound), even though this requirement is traversed. Applicant should include a chemical structure of the elected compound if not already contained in the specification.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

To be complete, a response to the election of species requirement should include a proper election along with a listing of all claims readable thereon, including any claims subsequently added. MPEP 809.02(a).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marina Lamm whose telephone number is (703) 306-4541. The examiner can normally be reached on Monday to Friday from 9 to 5.
